# Source global medical products efficiently, connect lastingly

At FIME, the largest medical trade show in the Americas, our main purpose was to create a unique platform where the global medical community could efficiently source the latest medical products from around the world and establish lasting connections. We listened to your needs, and we delivered an event that not only showcased the latest advancements in healthcare but also fostered valuable networking opportunities.

Held in Miami Beach, FIME 2024 enabled attendees to discover and acquire cutting-edge medical products, network with medical dealers and distributors, industry leaders, manufacturers, decision-makers, policy makers, and healthcare experts. Our event provided a matchless opportunity

to explore business prospects, witness technological advancements, and build enduring partnerships.

FIME 2024 was designed to help visitors and exhibitors achieve their goals, drive their businesses forward, and enhance their presence in the medical industry. The event also featured empowering educational sessions on critical topics shaping the future of healthcare.

This year, FIME created new opportunities for the global medical industry and set the stage for even greater accomplishments in 2025 and beyond. This report summarizes the potential and outcomes achieved, paving the way for new ambitions and advancements at FIME 2025.

# FIME 2024 Overview

"For Infinium the 2024 FIME exhibition was a milestone for both the growth of our product lines and the impact of the show. We decided on a larger 20x20 island space and were very pleased with the ability to showcase full surgery suites in a more natural setting. We had great client meetings, and the expanded space attracted more foot traffic and interest from partners and customers from many different countries. It was well worth the upgrade, and we are looking forward to next year!"

**Justin Jeffries, Marketing Director**  
at Infinium Medical

"Following the first day of the show, the description given was 'AWESOME'! We were hesitant with the large number of Show visitors, but every visitor was genuinely interested, and all were high-quality prospects for our company, consisting of physicians, practitioners, distributors and more. The U.S. Department of Commerce attended the Show; we will be working together to export our products as a U.S. medical device manufacturer. They will help with the real need for U.S. made medical devices getting to Central and South American countries. As a result of the excellent 2024 FIME Show, Dynaris has signed a contract for the 2025 FIME Show!"

**Lon Aylsworth, CEO/CTO at Dynaris**
